

# INSTRUCTIONS FOR THE POPCORN MACHINE

Step 1

1. Unpack Machine, open 2 clear doors.
2. Pull down lower door.
3. Remove Scoop and lower tray. Install lower seed tray.
4. Make sure kettle is securely in place.

Step 2

- Turn on all 3 switches when popping.  
Leave **switch #3 ON** after popping to keep popcorn hot.

Step 3

1. Open kettle door
2. Make sure the stir bar is spinning.

Step 4

- Using a pair of scissors, cut the corner off of the oil side and pour contents into the kettle. Then, cut the corner off the corn side and pour contents into the kettle. Make sure to shake all ingredients out of corn side as it has the salt and flavoring in powder form.  
**“Only 1 pack at a time in the kettle.”**

# INSTRUCTIONS FOR THE POPCORN MACHINE

Step 5

After contents are in the kettle, close the kettle door. Leave clear doors open while popping.

Step 6

After the popcorn starts to pop, it will come out of the kettle and fall to the warmer plate.

Step 7

**“Very Important”** Once the popping slows down, you need to dump the kettle by pulling on the handle ① and bang it a few times to make sure all the corn is out of the kettle, repeat **steps 3-5** until base is full of popcorn

Step 8

After popping is complete, turn off all switches except the heat lamp switch (far right switch) and close all doors to keep popcorn hot.

Step 9

Open clear doors and pull lower metal door open to dispense and fill popcorn bags.

**Enjoy!!!**
